

TECHNICAL SPECIFICATIONS

Main Fire Alarm Panel
 Manufacturer : Micro-CTL Electronics Sdn. Bhd.
 Brand : Mictron
 Model : 9900
 Part Number : AXP-M9900
 Operating Temperature : 0°C - 45°C
 Humidity : Max 95% (non-condensation)
 Panel Construction : Mild steel/1.5mm thickness
 Finishing : Epoxy powder coated paint
 Colour : Light gray or red
 Dimension : 720mm (W) 430mm (H) 150mm (D)
 Weight : 18.6kg (exclude battery)
 Testing Standard : MS1745 Part2 : 2004
 : EN 54 Part2 : 2004
 Test Report : 2014EEB0449, SIRIM

Power Supply & Charger
 Part Number (excl. battery) : AXP-9PS
 Input AC voltage : 220V-240VAC 50Hz
 Type : Constant Voltage and Current
 Maximum Output Voltage : 27.5VDC
 Maximum Output Current : 10A
 Power switches : AC on, CPU on, RPPU/LC on & Bell on

Battery
 Manufacturer : MSB/GP

P1: System Control Display
 Part Number : AXD-9SC
 Display Panel Size : 179mm(W) 325mm(H)
 Material : ABS
 Feature : 1 x Graphics LCD (128 x 64 pixel)
 4 x Auxiliary output 24VDC
 2 x RS232 serial communication
 Operating voltage : 20 - 28VDC
 Operating current : 140mA

P2: Fire Zone Display
 Part Number : AXD-9FZ
 Display Panel Size : 179mm(W) 325mm(H)
 Material : ABS
 Feature : 7 x Alphanumeric LCD (16 x 2)
 Operating voltage : 20 - 28VDC
 Operating current : 6mA

P3: Information Display
 Part Number : AXD-9PT
 Display Panel Size : 179mm(W) 325mm(H)
 Material : ABS
 Feature : Optional space for panel printer

Loop Controller Module
 Part Number : AXM-9LC
 Feature : 2 loops per card
 Communication method : Meter Bus
 Operating voltage : 20 - 28VDC
 Operating current : 44mA
 Output Loop voltage : 20 - 27VDC
 Maximum loop current : 300mA per loop
 Maximum devices : 126 per loop
 Maximum loop wire length : 1.2KM (un-twisted pair)
 2.0KM (twisted pair)
 Type of loop wire : PVC insulated cable 1.5mm²
 Dimension : 89mm (W) 64mm (H)

MICTRON 9900 FIRE ALARM SYSTEM

1 2 3 10 88 126
 ANALOGUE ADDRESSABLE

Mictron 9900 is a fire alarm control & monitoring system suitable for simple to complex installations. Its modular design can interface up to 16 loops in a single cabinet.

Each loop can interface up to 126 devices with combination of input / output modules, smoke detectors, heat detectors and breakglasses.

A 128 x 64 graphic LCD with keypad arranged in "ATM format" is used for operator interface.

Fire zone information is displayed on a separate panel with 7 units of LCD. The user will be able to select the status to be displayed by using the scroll key.

MS1745

EN54

- From 2 loops to 16 loops, with 126 devices per loop.
- Selectable hard or soft addressing of devices.
- Fully monitored loops for integrity and surge protection.
- Multi access levels with password protection.

- Programmable up to 600 fire zones & 600 un-supervised input points.
- 1000 alarm log & 400 general fault or disabled log.
- System Control Display panel with graphic LCD and backlight.
- Built-in 10A power supply & charger with surge suppressor.

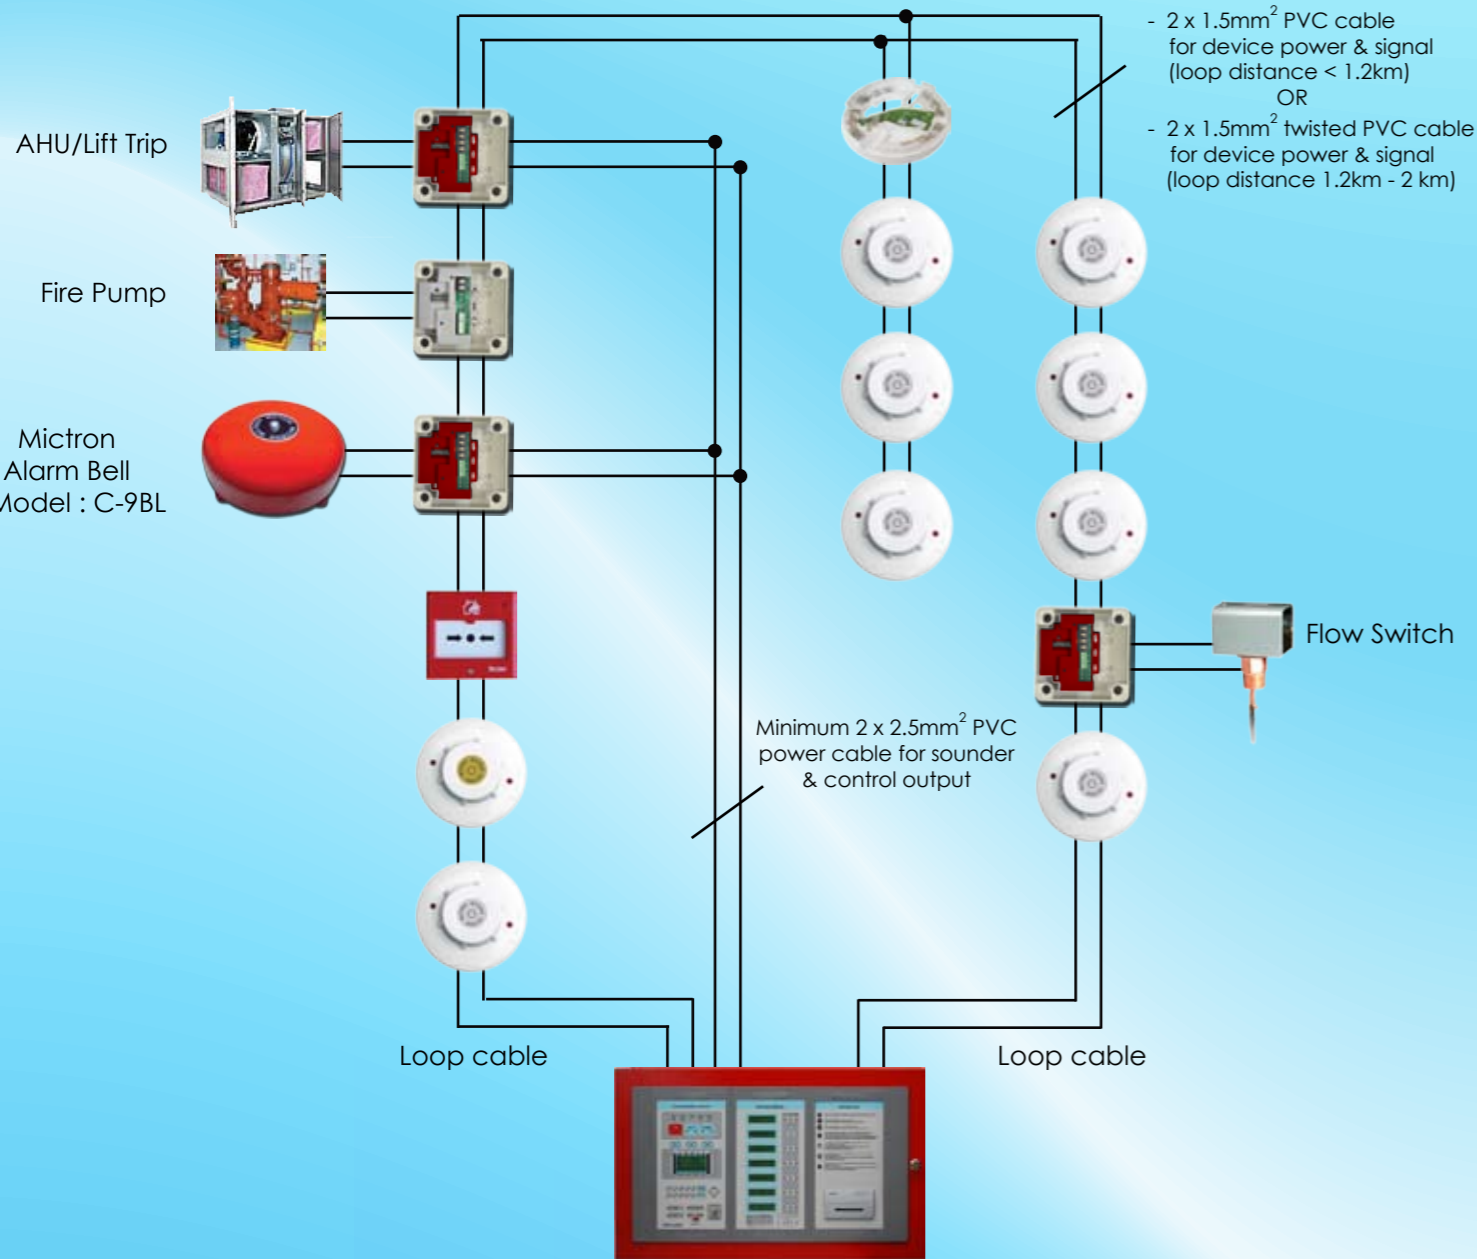

- Fire Zone Display panel with 7 alphanumeric LCD (16 x 2) to display zone location.
- Functions for zone display by scrolling up & down or view page by page.
- Selectable zone condition view - All Zone, Alarm, Fault, Disable & Test functions.
- 128 programmable sounder and input/output groups (64 devices/group).

- Optional repeater/sub-panel or printer interface.
- Optional windows based PC graphics software.
- RS232 serial communication with other building systems.
- Optional optical fiber, WiFi or telecom line interface by modems.

Micron 9900 Analogue Addressable Fire Alarm System Schematic Diagram
(Maximum devices per loop: 126)

Type	LED Repeater	MIMIC Repeater	LCD Repeater	SFAP Control Panel	PC Control Terminal

Use for	2x20 LEDs alarm indicating panel (max. 15 panels)	Multi-color mimic on perspex with alarm LED	4 lines LCD alarm message display (optional printer)	Full control function repeater identical to main panel	Windows based real time software with floor plans
Local Control Function	No	No	No	Yes	Yes
Power Supply	24V DC or external PSU & battery, power by 240V AC	24V DC or external PSU & battery, power by 240V AC	24V DC or external PSU & battery, power by 240V AC	24V DC or 240V AC (with internal battery)	240V AC (with UPS)

PHOTOELECTRIC SMOKE DETECTOR
MODEL: AX-9SL

FIXED TEMPERATURE & ROR HEAT DETECTOR
MODEL: AX-9HL

Dual LED indicators for 360° viewing angle. The LED will be flashing if communication with main panel is established

Selectable switches are provided for change of detector address at field (Optional soft addressing is available)

Unique smoke sensing chamber, with stainless steel wrap-around wire mesh for protection against dirt, dust and flying insect

Common Features

Built-in remote LED (Light Emitting Diode) driver

Polarity insensitive for easy wiring unless wired to isolator base

Electronic thermistor sensor is used for long term accuracy & reliability

Smoke density analogue value for normal, pre-alarm & alarm condition

Common Features

Heat detector analogue value for normal and alarm condition

1 ZONE + 1 CONTROL OUTPUT OR 1 STATUS INPUT + 1 CONTROL OUTPUT MODULE
MODEL: AXM-1ZV-A

1 ZONE + 3 STATUS INPUT OR 4 STATUS INPUT MODULE
MODEL: AXM-1ZV-B

Small & compact design for easy installation

Housed in a robust casing for added protection, suitable for indoor & outdoor installation

Suitable for 1 sounder/control output and 1 flow switch zone input

Common Features

Designed for 4 unsupervised inputs or 1 supervised input & 1 output

Using latest technology to offer high reliability at competitive price

Suitable for pump monitoring, CO₂ panel, valve input as well as 1 zone input

SHORT CIRCUIT LOOP ISOLATOR
MODEL: AX-9SCI

ADDRESSABLE BREAKGLASS
MODEL: AX-9BG

Loop wire short circuit isolator design for loop controller AXM-9LC

Low current with external fault LED if the isolator is activated

Common Features

The LED will be turned on by the panel if the breakglass is activated

Unique ALARM/RESET test tool for easy maintainance

PORTABLE TESTER

The portable tester is used to set the address of the AX detectors & devices (soft addressing), it is power by AC adaptor or battery. The tester can also be used to read the status of the detector or device & show on its LCD , as well as control the LED or the output.
